

Curriculum Plan – Sociology

*Called as God's family,
we strive to achieve our personal best,
by living and learning in Christ.*

Department Mission Statement -

The A level sociology department program strives to prepare the sociological imagination of its pupils, which involves the ability to understand how individual and group behaviour is shaped by society's historical development, how personal problems are connected to public issues of the social structure. This imagination promotes critical thinking skills, and promote a healthy respect for research. Our students experience a rigorous curriculum involving theoretical and methodological inquiry aimed at critical thinking, social awareness and justice. As a result students leave with a solid foundation that helps them to question critically, think logically, and to live ethically.

Key Stage 5 Knowledge and Skills Requirement (What knowledge and skills do pupils need to gain by the end of year 13?)

Knowledge To Be Built	Skills To Be Developed
<p>The study of A level sociology must focus on contemporary society. Studying sociology must foster the development of critical and reflective thinking with a respect for social diversity. It must provide an awareness of the importance of social structure and social action in explaining social issues. Students must be encouraged to develop their own sociological awareness through active engagement with the contemporary social world.</p> <p>All the following must be an integral part of the study of each topic area: sociological theories, perspectives and methods, the design of the research used to obtain the data under consideration, including its strengths and limitations.</p> <p>In year 12 students study families and households, in a similar way to education, they look at the structure and evolution of families, what different groups of Sociologists have to say about the position of families within society.</p>	<p>Sociology is a rigorous academic subject that complements a range of other subjects through its development of analytical and evaluative skills and the essay writing and critical thinking skills learnt in sociology are excellent preparation for university and for career paths such as law, the police, criminology, journalism, social work and marketing.</p> <p>Students should be able to:</p> <ul style="list-style-type: none">organise evidence and communicate arguments in a coherent manner• demonstrate an awareness and understanding of theoretical debates in sociology• use evidence to support and sustain arguments and conclusionsdistinguish between facts, opinions and value judgements• select and apply a range of relevant concepts and theories• interpret qualitative and quantitative data• identify and evaluate significant social trends shown in evidence• evaluate theories, arguments and evidence <p>organise evidence and communicate arguments in a coherent manner</p>

Curriculum Plan – Sociology

<p>Moving into year 13, students begin the final year of the course by studying the unit of Belief in Society they start by examining the role religion has today, considering topical issues such as secularisation, fundamentalism, the rise of cults and sects and the impact of globalisation and science on beliefs.</p> <p>In Crime and deviance they examine the police and criminal justice system as another institution within society and assess its function and role within society, as well as continuing with the running theme of who benefits and who loses out from the existence of these institutions.</p> <p>Finally, students will consolidate and build on their understanding of sociological theory exploring functionalism, Marxism, feminism, action theories, postmodernism as well as considering whether sociology is a science and links between sociology and social policy.</p>	<ul style="list-style-type: none"> • demonstrate an awareness and understanding of theoretical debates in sociology • use evidence to support and sustain arguments and conclusions.
